

Maths

This term we will be looking at decimals, including:

- Their place value
- Rounding decimals
- Multiplying and dividing decimals by 10, 100 and 1,000
- Multiplying and dividing decimals by integers

We then move onto find decimal, percentage and fraction equivalences.

English

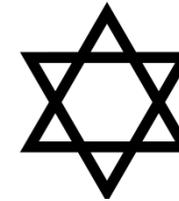

This term we will begin by reading 'The Promise' by Nicola Davies where we will be writing an environmental campaign focussing on persuasive language and techniques. Next, we will cover '1,000-year-old boy' by Ross Welford, where we will be focussing on narrative writing skills. Finally, we will be working from the poem 'On the move' by Michael Rosen, where we will be writing an explanation text.

50 Things

Plan and cook a meal (19)

Wolves class Term 4

Religious Education

Our focus question for R.E this term is 'What does it mean to be Jewish in Britain today? We'll be looking at their key beliefs, place of worship and festivals.'

Science - Physics

In science this term, our module is entitled 'Light'. We will investigate how we can prove light travels in straight line, how our eyes work and how the light spectrum forms rainbows.

Geography

South America is the focus of our geography learning this term. We will be looking at its location, religions, population and comparing some countries in the continent with England.
